CLAIMS

- 9. (New) The foot inclination angle measuring method as set forth in claim 1, wherein the two-dimensional cross section is a two-dimensional cross section of the foot in a position ahead of a rearmost end of the foot by a distance of not less than 4% nor more than 11% of the length of the foot.
- 10. (New) The shoe or shoe sock liner selecting method as set forth in claim 2, wherein the two-dimensional cross section is a two-dimensional cross section of the foot in a position ahead of a rearmost end of the foot by a distance of not less than 4% nor more than 11% of the length of the foot.
- 11. (New) The shoe or shoe sock liner manufacturing method as set forth in claim 5, wherein the two-dimensional cross section is a two-dimensional cross section of the foot in a position ahead of a rearmost end of the foot by a distance of not less than 4% nor more than 11% of the length of the foot.
- 12. (New) The foot inclination angle measuring system as set forth in claim 8, wherein the two-dimensional cross section is a two-dimensional cross section of the foot in a position ahead of a rearmost end of the foot by a distance of not less than 4% nor more than 11% of the length of the foot.
